

PROJECT: Gregg E. Heim Player Development Center
LOCATION: Auburn, AL
SIZE: 12,000 SF
PROJECT TYPE: Community
GENERAL CONTRACTOR: J.A. Lett Construction
ROOF PANELS: Ultra-Lok
WALL PANELS: FW-120

OVERVIEW:

The Gregg E. Heim Player Development Center gives Auburn University's softball program a dedicated indoor space for hitting, pitching, and infield practice. ACI's building system combines a 112-foot clear span with custom radius roof framing, providing an open training area beneath a curved roofline. Six batting tunnels and retractable netting allow the space to accommodate individual drills and team practice throughout the year.

FEATURES:

- Structural support for 16 goal assemblies
- Support for four divider curtains
- Support for eight scoreboards
- Integrated building and athletic-facility requirements
