

PROJECT: Huntsville Fire Station #20

LOCATION: Madison, AL

SIZE: 6,858 SF

PROJECT TYPE: Community

GENERAL CONTRACTOR: Pearce Construction Company

ROOF PANELS: StratoShield

WALL PANELS: 7.2 Panel

## OVERVIEW:

Built to serve the growing northwest Huntsville community, Fire Station #20 provides two apparatus bays and dedicated living and operational spaces for firefighters. Working with Pearce Construction Company, ACI Building Systems supplied 38 tons of steel, including a custom-length standing seam roofing system. The new facility helps improve emergency response times while extending fire protection coverage to surrounding neighborhoods.

## FEATURES:

- 72'-6" continuous, one-piece StratoShield roof panel
- 24-gauge Snow White StratoShield roofing
- LT 3.3 wall panels
- Two apparatus bays with dedicated firefighter support facilities
