

PROJECT: Alabaster Water Board

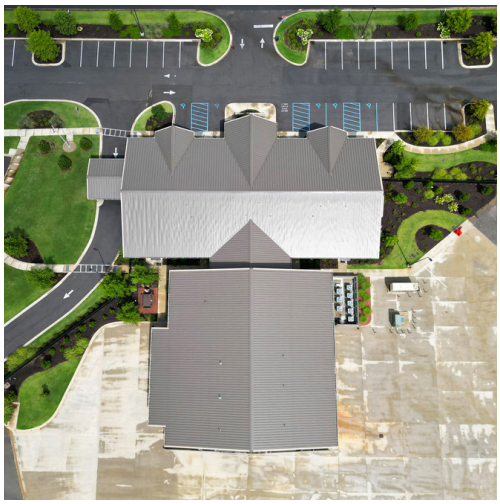

LOCATION: Alabaster, AL

SIZE: 35,808 sq. ft.

PROJECT TYPE: Community

GENERAL CONTRACTOR: Amason & Associates

ROOF PANELS: Ultra-Lok

OVERVIEW:

The Alabaster Water Board facility brings administrative and field operations together in one complex. ACI Building Systems supplied both the pre-engineered metal building package for the equipment shop and supporting structures and the architectural roofing for the main office. The project showcases ACI's ability to meet diverse structural and architectural requirements through a single manufacturing source.

FEATURES:

- 8,125-square-foot equipment shop with large overhead-door openings
- 3,000-square-foot open-sided structure and attached canopy
- 13,369 sq. ft. of architectural roofing
- Complex roof design featuring intersecting gables, valleys, and varying slopes
