ACI BUILDING SYSTEMS

PROJECT: Mitchell Chrysler, Jeep, Dodge, & Ram

LOCATION: Enterprise, AL

SIZE: 27,373 SF

PROJECT TYPE: Commercial

GENERAL CONTRACTOR: Enco Construction Co.

ROOF PANELS: StratoShield Standing Seam

WALL PANELS: PBR

OVERVIEW:

Mitchell Chrysler Dodge Jeep Ram brings multiple automotive brands and a busy service operation together in one facility. The dealership features expansive glass storefronts, prominent showroom entrances, and covered service areas designed to accommodate both customers and daily operations. ACI's metal building system provided the flexibility to support these different spaces while bringing the dealership's modern architectural design to life.

FEATURES:

- Eight interconnected metal building sections
- Combination of modular and clear span framing
- 24 gauge StratoShield standing seam roofing
- Large overhead door openings for vehicle access
- Structural support for eight rooftop HVAC units
