

PROJECT: Dr. Josetta E. Wilkins Jefferson County Health Unit

LOCATION: Pine Bluff, AR

SIZE: 12,834 SF

PROJECT TYPE: Community

CONTRACTOR: Commercial Construction & Maintenance, Inc.

ROOF PANELS: UltraLok

WALL PANELS: PBM Panels, SWP Soffit Panels

OVERVIEW:

The Dr. Josetta E. Wilkins Jefferson County Health Unit in Pine Bluff, AR, houses exam rooms and a laboratory in a 12,834-square-foot facility. An enclosed walkway connects the exam and administration wings and frames an outdoor courtyard. ACI supplied metal roof, wall, and soffit panels and spandrel framing for a design that combines brick and glass with several roof elevations. Across the five buildings in ACI's scope, the team coordinated 31 distinct anchor bolt layouts so the steel framing would align with the foundations in the field.

FEATURES:

- 31 distinct anchor bolt layouts
- Spandrel framing for lateral wall support
- Multiple roof elevations
- Enclosed walkway between exam and admin wings
